

Medical Family Therapy Program

Communities of Interest

Our program identifies several partners and collaborators as part of our communities of interest. We specifically have joined with individuals, programs, departments, and collaborators who help the mission of the program and carry out our program goals and SLOs in an effective way. The program holds a regular Communities of Interest Meeting (See Appendix 3), where we bring our community partners and stakeholders together to review our accomplishments, goals and future directions as a program. Several of these partners have helped advance the program through clinical, scholarly, research and community areas in marginalized and/or underserved areas of St. Louis and surrounding areas.

Members of the program's Communities of Interest are gathered from the following places:

- Department of Family and Community Medicine at SLU (Faculty and Staff)
- Graduate Student Association (current students in program) at SLU
- Alumni of the Program (Students in the community and around the country)
- Office of Diversity, Equity and Inclusion at SLU
- Faculty from Geriatric Medicine and Psychology at SLU
- Community physicians, therapists, and supervisors (Affiliated with both programs)
- Metro Trans Umbrella Group (Serving the LGBTQ population)
- Community supervisors of the Master's and Doctoral Programs
