Project Code: STLU0003
Project Name: Missouri Likely Voters July 2021
Prepared for: Steven Rogers
Interviews: 950
Field Period:  July 19, 2021 - July 29, 2021
Project Manager: Sam Luks - 650.462.8009
================================================================
```

YouGov interviewed 1240 respondents with 989 completing the full survey.

YouGov conducted a benchmarking survey of Missouri Likely voters using a
census click methodology, which involves sampling in such a way that all
starts to a particular survey are representative of the known demographic
characteristics of a specific target group. In this case, YouGov sampled
so all starts were representative of Missori registered voters population,
as defined by the 2020 Current Population Survey (CPS) November.

The sample of all starts was matched from 1125 respondents to 950 completes and
weighted to a population frame on age, gender, race, education. YouGov used
propensity score weighting. In the propensity score weighting process, the
matched cases and frame were combined and a logistic regression was estimated
for inclusion in the frame. The propensity score function included age, gender,
race/ethnicity and years of education. The propensity scores were grouped into
deciles of the estimated propensity score in the frame and post-stratified
according to these deciles.

The weights were then post-stratified on 2016 and 2020 Presidential vote choice,
and a four-way stratification of gender, age (4-categories), race (4-categories),
and education (4-categories). The weights were then subsetted on completes and
re-centered to produce the final weight for the target population2.37799 1 Tc 11 0 0 11
